

Wazuh Additional Resources

R. Frohman, M. Martin, H. Walden

This document provides additional resources that would integrate well with Wazuh and how it could help secure your data.

Documentation and Guides

- **Wazuh Documentation:** The official Wazuh Documentation is essential for understanding installation, configuration, and troubleshooting.
- **Elastic Stack Documentation:** Since Wazuh often integrates with the Elastic Stack, the Elastic Stack Documentation is useful for configuring Elasticsearch, Logstash, and Kibana.

Training and Tutorials

- **Wazuh YouTube Channel:** Contains various tutorials and webinars.
- **Udemy Courses:** There are courses specifically tailored to Wazuh, Elasticsearch, and general cybersecurity practices.
- **LinkedIn Learning:** Offers training on network security and specific tools that integrate with Wazuh.

Community and Support

- **Wazuh Community Forum:** The Wazuh Community Forum is a good place to ask questions and share experiences.
- **GitHub Issues and Discussions:** Engage with the community on the Wazuh GitHub page.
- **Reddit and Stack Overflow:** Various threads and discussions on Wazuh and network security.

Additional Tools

- **Wireshark:** For detailed packet analysis.
- **Nmap:** For network scanning and discovery.
- **Zeek (formerly Bro):** Network analysis framework.
- **Suricata:** For intrusion detection and network security monitoring.

Integrations and Plugins

- Security Onion: Comprehensive, free, and open threat-hunting and enterprise security monitoring tool.
- Osquery: An SQL-powered tool to query and monitor system information.
- Beats: Lightweight data shippers for Elasticsearch.
- Sigma: Generic signature format for SIEM systems.

Sample Data and Test Environments

- Malware Traffic Analysis: Provides sample PCAP files for testing.
- Cyber Range Platforms: Such as TryHackMe or Hack The Box, to practice and simulate network attacks and defense mechanisms
